

Current week

Concern about the impact of the coronavirus

To what extent are you personally concerned or not concerned about the impact of the novel coronavirus in the following areas of life?
(Response scale: 1 'not concerned at all' to 5 'very concerned')

Perceived level of information

How well do you feel informed about the following aspects of the novel coronavirus?
(Response scale: 1 'not well informed at all' to 5 'very well informed')

Figures given in percentages
 Basis: 947–984 participants

Evaluation of media coverage

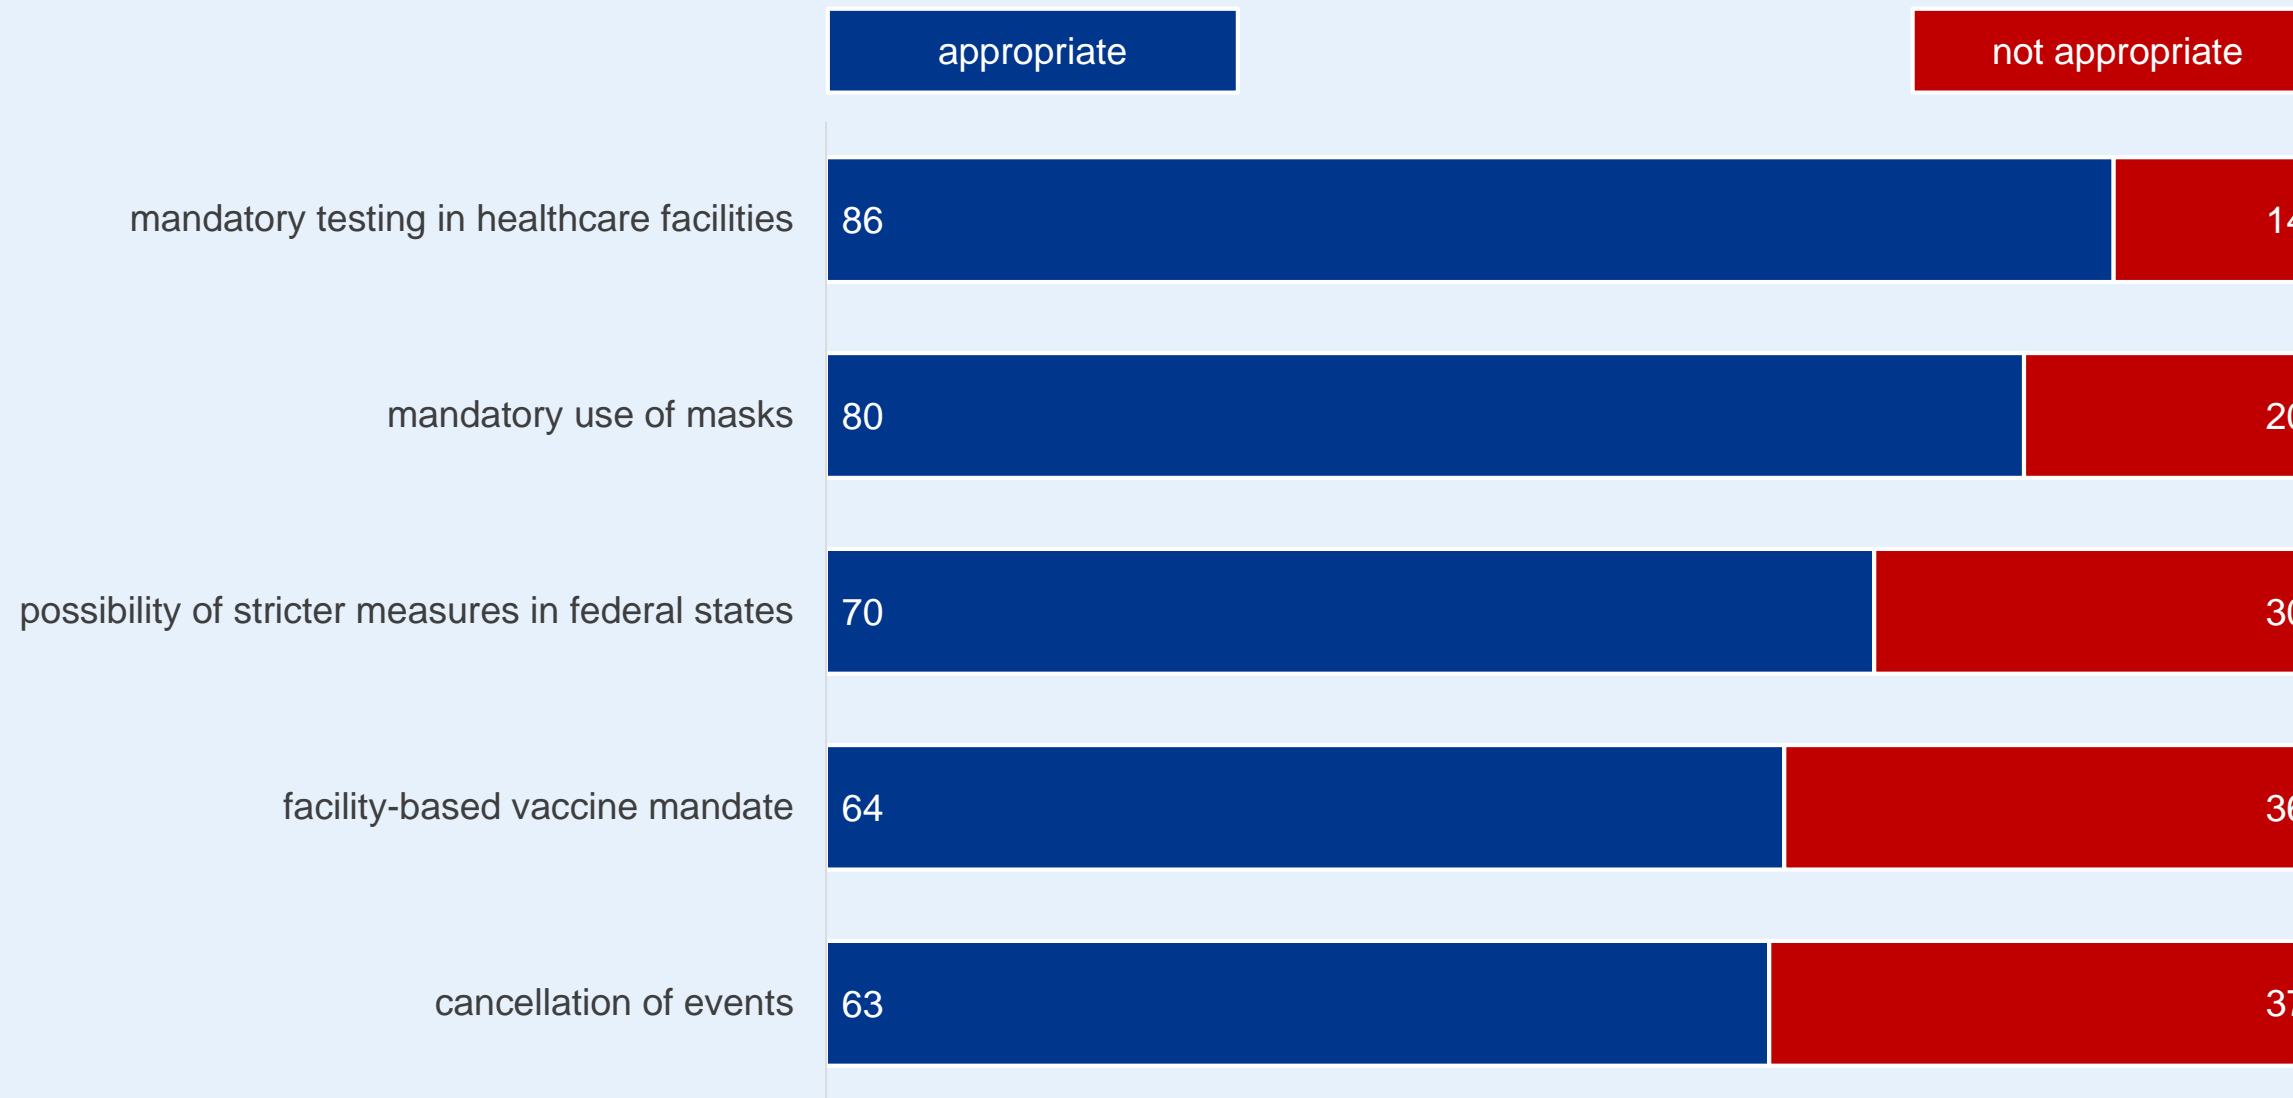

How do you evaluate the overall media coverage of the novel coronavirus?
(Response options: 'downplaying', 'appropriate', 'exaggerated')

Appropriateness of the measures for containment

How do you evaluate the following measures to contain the spread of the novel coronavirus?

(Response options: 'not appropriate', 'appropriate')

Current protective measures of the participants

Which of the following measures have you taken within the past 2 weeks to protect yourself or others from the novel coronavirus?
(multiple selection)

Perceived controllability of the risk of infection

How sure are you that you can protect yourself from an infection with the novel coronavirus?
(Response scale: 1 'not sure at all' to 5 'very sure')

Figures given in percentages
Basis: 989 participants

Behaviour of others

When dealing with other people, how important is it to you that they take measures to prevent a transmission of the novel coronavirus?
(Response scale: 1 'not important at all' to 5 'very important')

Perceived probability of an infection

How high or low do you estimate the probability of currently being infected with the novel coronavirus at the following locations?

(Response scale: 1 'very low' to 5 'very high')

Figures given in percentages
Basis: 913–994 participants

Over time

Concern about the impact of the coronavirus

To what extent are you personally concerned or not concerned about the impact of the novel coronavirus in the following areas of life?
 (Response scale: 1 'not concerned at all' to 5 'very concerned') – Shown: response category '(very) concerned' (values 4 + 5)

Figures given in percentages
 Basis: 977–1.035 participants

Perceived level of information

How well do you feel informed about the following aspects of the novel coronavirus?

(Response scale: 1 'not well informed at all' to 5 'very well informed') – **Shown: response category '(very) well informed' (values 4 + 5)**

Part of the questionnaire since February 2022

^a Measure was added to the questionnaire at the time indicated

Figures given in percentages

Basis: 946–1.004 participants

Evaluation of media coverage

How do you evaluate the overall media coverage of the novel coronavirus?
 (Response options: 'downplaying', 'appropriate', 'exaggerated')

Figures given in percentages

Basis Mar–May 2020: 480–502 participants

Basis from Jun 2020: 944–1.019 participants

Current protective measures of the participants I

Which of the following measures have you taken within the past 2 weeks to protect yourself or others from the novel coronavirus?
(multiple selection)

Figures given in percentages
Basis: 917–1.016 participants

Current protective measures of the participants II

Which of the following measures have you taken within the past 2 weeks to protect yourself or others from the novel coronavirus?
(multiple selection)

Figures given in percentages
Basis: 917–1.016 participants

Perceived controllability of the risk of infection

How sure are you that you can protect yourself from an infection with the novel coronavirus?
 (Response scale: 1 'not sure at all' to 5 'very sure')

Figures given in percentages
 Basis Mar–May 2020: 492–514 participants
 Basis from Jun 2020: 957–1.017 participants

Behaviour of others

When dealing with other people, how important is it to you that they take measures to prevent a transmission of the novel coronavirus?
 (Response scale: 1 'not important at all' to 5 'very important')

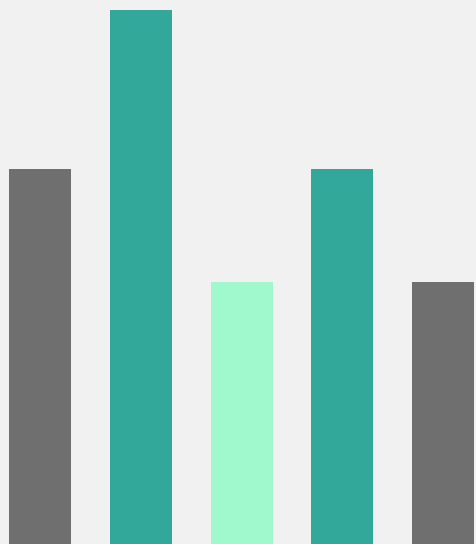

Perceived probability of an infection

How high or low do you estimate the probability of currently being infected with the novel coronavirus at the following locations?
 (Response scale: 1 'very low' to 5 'very high') – **Shown: response category '(very) high' (values 4 + 5)**

Figures given in percentages
 Basis: 899–1.014 participants

Age groups

Concern about the impact of the coronavirus

To what extent are you personally concerned or not concerned about the impact of the novel coronavirus in the following areas of life?
 (Response scale: 1 'not concerned at all' to 5 'very concerned') – **Shown: response category '(very) concerned' (values 4 + 5)**

Perceived level of information

How well do you feel informed about the following aspects of the novel coronavirus?

(Response scale: 1 'not well informed at all' to 5 'very well informed') – **Shown: response category '(very) well' (values 4 + 5)**

Figures given in percentages

Basis: 297–341 participants in corresponding age group

Evaluation of media coverage

How do you evaluate the overall media coverage of the novel coronavirus?
 (Response options: 'downplaying', 'appropriate', 'exaggerated')

Appropriateness of the measures for containment

How do you evaluate the following measures to contain the spread of the novel coronavirus?

(Response options: 'not appropriate', 'appropriate') – Shown: response category 'appropriate'

Figures given in percentages

Basis: 307–345 participants in corresponding age group

Current protective measures of the participants

Which of the following measures have you taken within the past 2 weeks to protect yourself or others from the novel coronavirus?
(multiple selection)

Figures given in percentages

Basis: 312–318 participants in corresponding age group

Perceived controllability of the risk of infection

How sure are you that you can protect yourself from an infection with the novel coronavirus?

(Response scale: 1 'not sure at all' to 5 'very sure')

Figures given in percentages

Basis: 311–346 participants in corresponding age group

Behaviour of others

When dealing with other people, how important is it to you that they take measures to prevent a transmission of the novel coronavirus?
 (Response scale: 1 'not important at all' to 5 'very important')

Perceived probability of an infection

How high or low do you estimate the probability of currently being infected with the novel coronavirus at the following locations?
 (Response scale: 1 'very low' to 5 'very high') – **Shown: response category '(very) high' (values 4 + 5)**

How were the data collected?

Statistical population:	German-speaking population ages 14 years and over in private households in the Federal Republic of Germany
Sampling:	Samples drawn at random from land line and mobile telephone numbers which can also include telephone numbers not listed in directories (in line with standards set by the Association of German Market Research Institutes – ADM)
Data weighting:	Data was weighted according to gender, education, age, employment, size of city and German federal state to guarantee representativeness
Method:	Telephone interview (CATI omnibus survey, Dual Frame)
Presentation of results:	All figures given in percentages, rounding differences are possible, only valid responses were included (response option ‘don’t know’ was excluded from all analyses)
Conducted by:	Kantar GmbH

About the BfR

The German Federal Institute for Risk Assessment, or BfR for short, is responsible for answering questions on all aspects of the health assessment of foods and feeds, consumer products and chemicals. Through its work, it makes a decisive contribution towards ensuring that food, products and the use of chemicals have become safer in Germany. The Institute's main tasks comprise the assessment of existing health risks and identification of new ones, the development of recommendations to limit risks and the transparent communication of this process.

This work results in the scientific advice given to political decision makers. To help with the strategic alignment of its risk communication, the BfR conducts its own research in the field of risk perception. The Institute is independent in its scientific assessments, research and communication. The BfR belongs to the portfolio of the Federal Ministry of Food and Agriculture (BMEL).
