

4th Joint Symposium on Nanotechnology

Nanotechnology is used as a key technology in numerous areas. The consideration of opportunities and risks will also be the focus of the 4th symposium. During the two-day event, topics such as the use of nanotechnology in textiles and packaging, its application in agriculture, the introduction of nanomaterials into the body and future-oriented assessment approaches will be presented.

The 4th Joint Symposium on Nanotechnology is organised by the German Federal Institute for Risk Assessment (BfR) together with the Fraunhofer Network Nanotechnology FNT.
